

Diamond Track

Easy to install, call 01277 353 686 for great deals.

Suitable for pedestrian use. Indoor and Outdoor Events.

Diamond Track is a temporary flooring solution for both indoor and outdoor use. It protects your valuable surfaces and areas of high pedestrian traffic from unsightly wear.

Benefits & Description

Diamond Track for Portable Flooring

This reliable product is a superb temporary or permanent solution for both indoor and outdoor applications. The tile is very lightweight and therefore makes it very easy to transport and move when needed. Diamond Track is made from recycled polypropylene for a strong and environmentally friendly result, if you need an even stronger surface we can also lay the product using the 'brick bonding' technique.

Diamond Track can also be laid quickly and efficiently with its easy to lock together edges for a seamless and aesthetic finish.

- Can be installed using the technique 'brick bonding' for an even stronger surface.
- Surface reinforcement with natural drainage.
- Low transport and handling costs.
- Lightweight and high strength durability.
- Ideal for permanent or temporary applications.
