| | | |
|------------------------|--|-------------------|
| Material: | 100% recycled HDPE | |
| Dimensions | | |
| Length: | 7'11" | 2410mm |
| Width: | 3'11" | 1200mm |
| Depth: | 0.5" | 12mm |
| Weight: | 77lbs | 35kg |
| Surface Area: | 31.2' ² | 2.9m ² |
| Transportation: | 650 x Euromats per EU standard curtain sided 13.6m trailer | |

*Compression tested at National Physical Laboratory, UK.

Features

Their large surface area disperses the weight of vehicles and enables our Euromats to be used for effective ground protection in areas such as gardens, parks, golf courses and cemeteries. Just think of the way our mats can help your application in ground or particularly ground protection where vehicles have to cross.

When you consider the cost of plywood sheets which do not resist water, snow, ice, mud or oil and are not anti-slip, then investment in our Euromats will pay off in a short period of time and provide peace of mind, safety and excellent ground protection.

Chevron Traction Surface

Their unique self cleaning grip surface is aimed at dispelling mud but will still give grip to vehicles or pedestrians as they cross the grass protection mats. The traction cylinder built into the underside of the mat also aid in gripping the surface, whether that be soil, grass or synthetic turf. These small cylinders prevent sliding and provide stability to the mat.
